

**Industry:** Communications

**Application:** Test Equipment

**Summary:** This 75 Watt single card converter provides conversion from 24V to -24V. Up to three hot swap cards can be paralleled for N+1 redundancy with forced current sharing.

**Specifications**

**Input:** 18-36 Vdc

**Output:** -24 Vdc

**Total Power:** 75 Watts

**Dimensions:** 5.5"W x 1.5"H x 6"L (fits in standard US telecommunications "400" size shelf)

**Operating Temperature:** -25 to +50°C

**Cooling:** Convection

**Other Features:** N+1 redundancy  
Forced current sharing  
Current limit  
Hot-swappable

*N-1002: N+1 Redundant  
Hot-Plug 24/-24V Converter*
